

**KU SG 1000-50 W, Microwave Generator**

Technical specifications:

|                      |                                    |
|----------------------|------------------------------------|
| Frequency range      | 10000 MHz                          |
| Output power         | min. 50 W                          |
| Waveform             | CW                                 |
| Protection functions | VSWR (Isolator), Overtemperature   |
| Remote control       | LAN with virtual COM adapter       |
| Supply Voltage       | 230 V / 50 ... 60 Hz               |
| Output / impedance   | WR-90                              |
| Temperatur range     | 10 ... 30 °C (ambient temperature) |
| Case                 |                                    |
| Weight               | 11250 g (typ.)                     |
